

Strathfield Cable Replacement Project

years old and are nearing the end of their serviceable life.

A similar cable project in progress

You are invited to a community information session

Ausgrid would like to invite local residents to a final community information session to ask questions and provide feedback on the preferred cable route. Following feedback received from the three previous sessions held in June and August, the team will also provide project updates.

Date: Thursday 29 September

Time: 6:00pm

Location: Sydney Cheil Church – 7 Sydney St, Concord

To register for our upcoming information session and sign up to receive project updates, please scan the QR code and provide your details.

The project team will share updated information on how the preferred route was determined and discuss ways Ausgrid can work with residents to reduce potential construction impacts.

New cables in your area

Ausgrid is seeking input from the community as we plan a new cable route between Ausgrid's substation on Lloyd George Avenue, Burwood and Ismay Reserve, Homebush. The project will also see the decommissioning of our cable transition point at Columbia Lane, Homebush. We will continue to use our substation on Lloyd George Avenue, Burwood.

These facilities are connected by existing fluid-filled underground 132kV sub-transmission cables that run between the two sites. The cables are approximately 50

We are proposing to replace the existing cables with new 132kV underground cables and conduits (plastic pipes) bypassing the cable transition point in Columbia Lane. This project is part of a program to retire fluid-filled cables across our network.

Next Steps

Following the final community information session in September 2022, the project team will consider and incorporate the community feedback received where possible.

Ausgrid is committed to minimising the impact of this project on the community as much as possible and will keep residents informed of the final route and project progress through notifications and door knocks. Notice will also be given before any major work in the area starts.

Construction is planned to commence in early 2023. Residents will be informed once construction dates have been finalised.

Preferred cable route

We are proposing to install the new cables under the road between Homebush and Burwood. A map of the preferred route for the new cable is over the page.

Starting from Ismay Reserve, Homebush, the new cables will be installed in conduits (plastic pipes) to be constructed across Parramatta Road and under the railway line into Carrington Street, and then following Concord Rd, Sydney Street, Inverary Street and Lloyd George Avenue.

We will also be installing two new steel poles in the Public Reserve at 20 Parramatta Road and removing a small section of the overhead wires and associated poles.

Current Project Timeline

Key dates

- Now**
Feedback used by Ausgrid to refine construction plans and complete site investigations
- Early 2023**
Project approval for detailed design and construction, contractor appointed, and construction program prepared
- Mid 2023**
Detailed design and start of construction
- Early 2024**
Installing cables and connect new cable to the existing network.
- 2024**
Retire existing cables
